MDT list Workaround

This guide provides teams with the ability to prepare for MDTs

Use the same temporary launching workaround as we used last week. Some radiologists may have saved shortcuts on their desktop as PACS bypass. If you have never used the temporary login work around before follow the steps highlighted below.

• Right click on the Vue PACS Radiology icon & select open file location:

1.b If you're right click button works skip this step if not follow the path below. First click file

explorer then Local Disk (C:) \rightarrow Program Files \rightarrow Philips \rightarrow PACs \rightarrow GHFTMAIN \rightarrow mv_client- then double click mp this should launch the pacs full client.

• From the bar at the top click mv_client:

> This PC > Local Disk (C	:) > P	Program Files > Philips > PACS > prt2Bridge	> mv_client > Native	Bridge >	
Å	^	Name	Date modified	Туре	Size
Ŕ		Microsoft.AspNetCore.SignalR.Protocols.J	15/09/2019 19:14	Application extens	
e		Microsoft.Bcl.AsyncInterfaces.dll	14/04/2020 20:39	Application extens	
e		Microsoft Extensions Configuration Abstr	15/04/2020 01:35	Application extens	

• Scroll down to the mp.exe icon & double click:

nft sent22 PriPACSNI	Rt chestizin					
📕 🔻	Manage	mv_client				\times
Home Share View	App Tools					~ ?
✓ ↑ 📜 « PACS > prt2	Bridge > mv_o	client > ~	Ö	,∽ Sear	ch mv_cli	ent

• Right click anywhere along the filers highlighted above

• Select field chooser

- Find custom worklist click, hold and drag it into the filter options. ٠
 - Customization

Elapsed Time				
		Has Report	Order Status	Patient ID

- In the field demonstrated above, type the desired name for your folder, something short for • example RD MDT 24/05/23 and press the enter key on your keyboard
- Then save the filter as a folder, either using the icon below or by right clicking on the custom • worklist column header and selecting 'save filter as folder'

Source AE	Custom Worklist		Remove Column	ne
	RD MDT 24/05/23		Field Chooser	
		7	Clear Field Filter	
			Reset Filter	
				1
			Save Filter as Folder	
		P43	Save Folder Unanges	
			Reset View	
			Save as Default Settings	
			Export Table	

• You will then see the folder on the LHS of your PACS alongside your other folders

• Manually search each patient that you would like to include in your MDT list. When you find the study you would like to include, single left mouse click in the custom worklist field and add your tag (RD MDT 24/05/23) and click enter. This will add this tag to the patients study.

- Repeat this process of searching for the patient and adding the tag for each patients study you would like to include in the MDT list.
- Any studies you have tagged will appear in the new folder you have created. If you would like to remove any of these studies from your folder, simply delete the tag you have typed into the custom worklist column.
